

Installation Procedure for "JA" Removable Skirt Panel

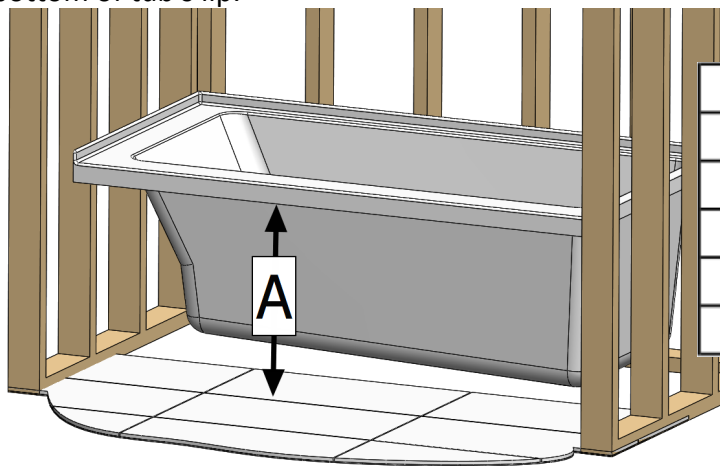

Serial Number : _____

Model Name: _____

Date of Manufacture : _____

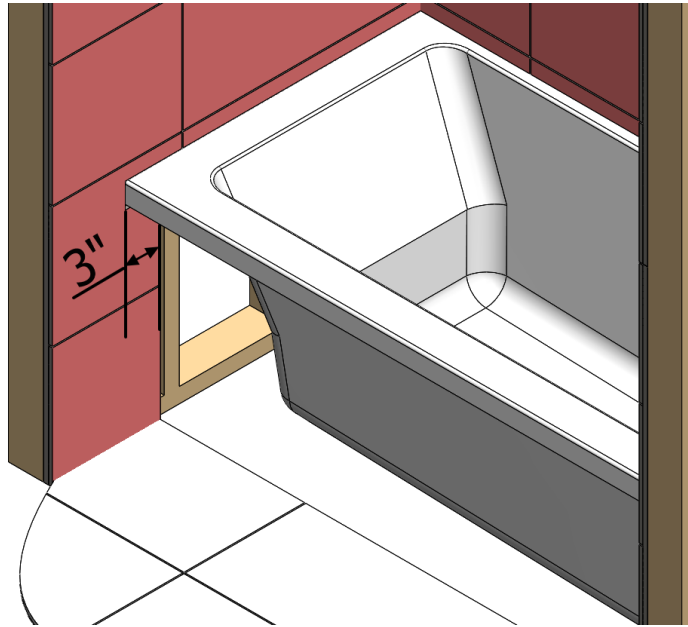

-For Warranty, please refer to our website: <http://www.oceania-attitude.com>

1. Install the bathtub as described in the Installation Manual provided with the tub. Adjust tub's height (A) in function of the "JA" skirt to be installed. Note : dimension A is taken from the finished floor to bottom of tub's lip.

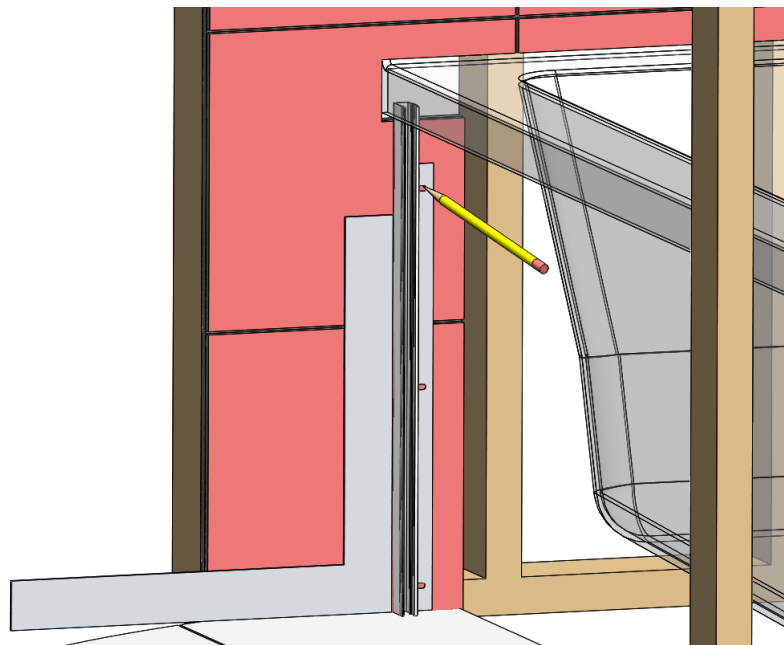

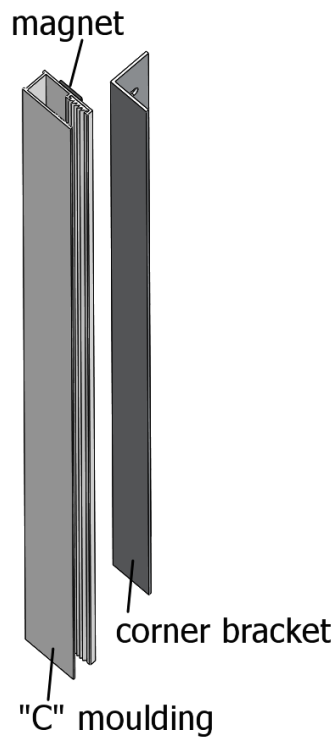

Skirts	A (in)	A (cm)
JA60S	18¾"	46,4
JA60	20½"	52,1
JA66	20¼"	51,4
JA72	20¼"	51,4
JAXL	21¼"	53,9

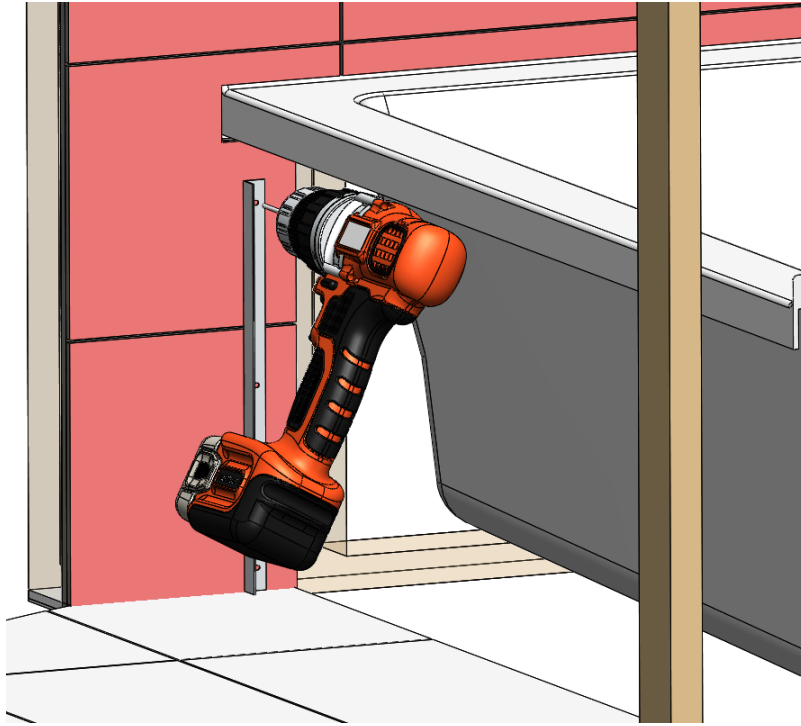

2. Install the drywall and finish the walls (tiles). Important : Extend the drywall and the tiles under the tub for a minimum of 3". Finish the floor and extend it to a minimum of 3" towards the tub as well.

3. Install the corner brackets under the tub. Tip : join together the "C" moulding and the corner bracket. Make it rest against the inner side of the tub lip and on the finished floor. Make sure it is square. Mark the position of the holes.

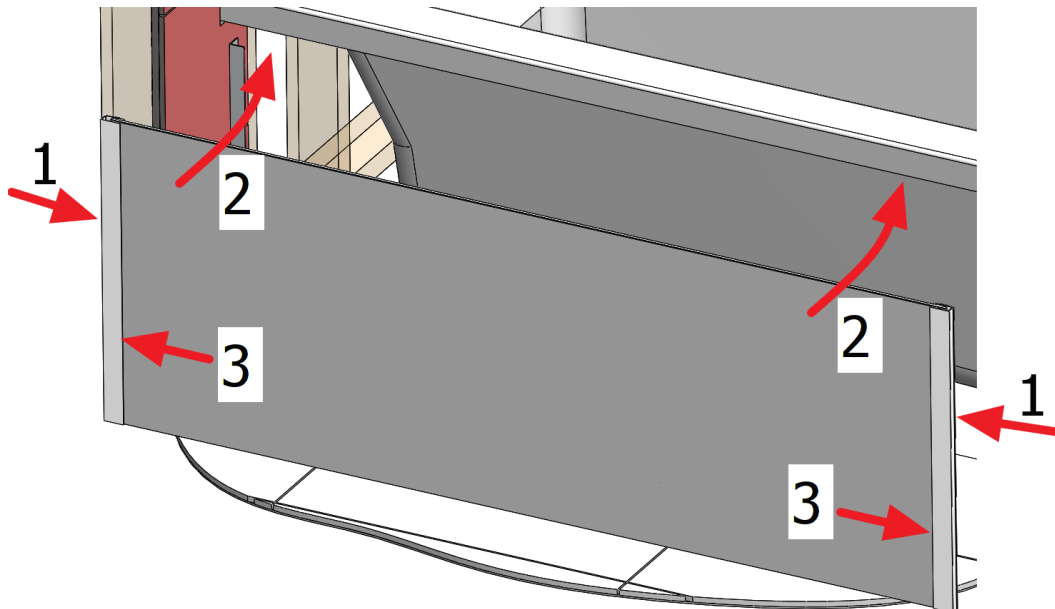

4. Drill holes and secure corner brackets with screws (not supplied).

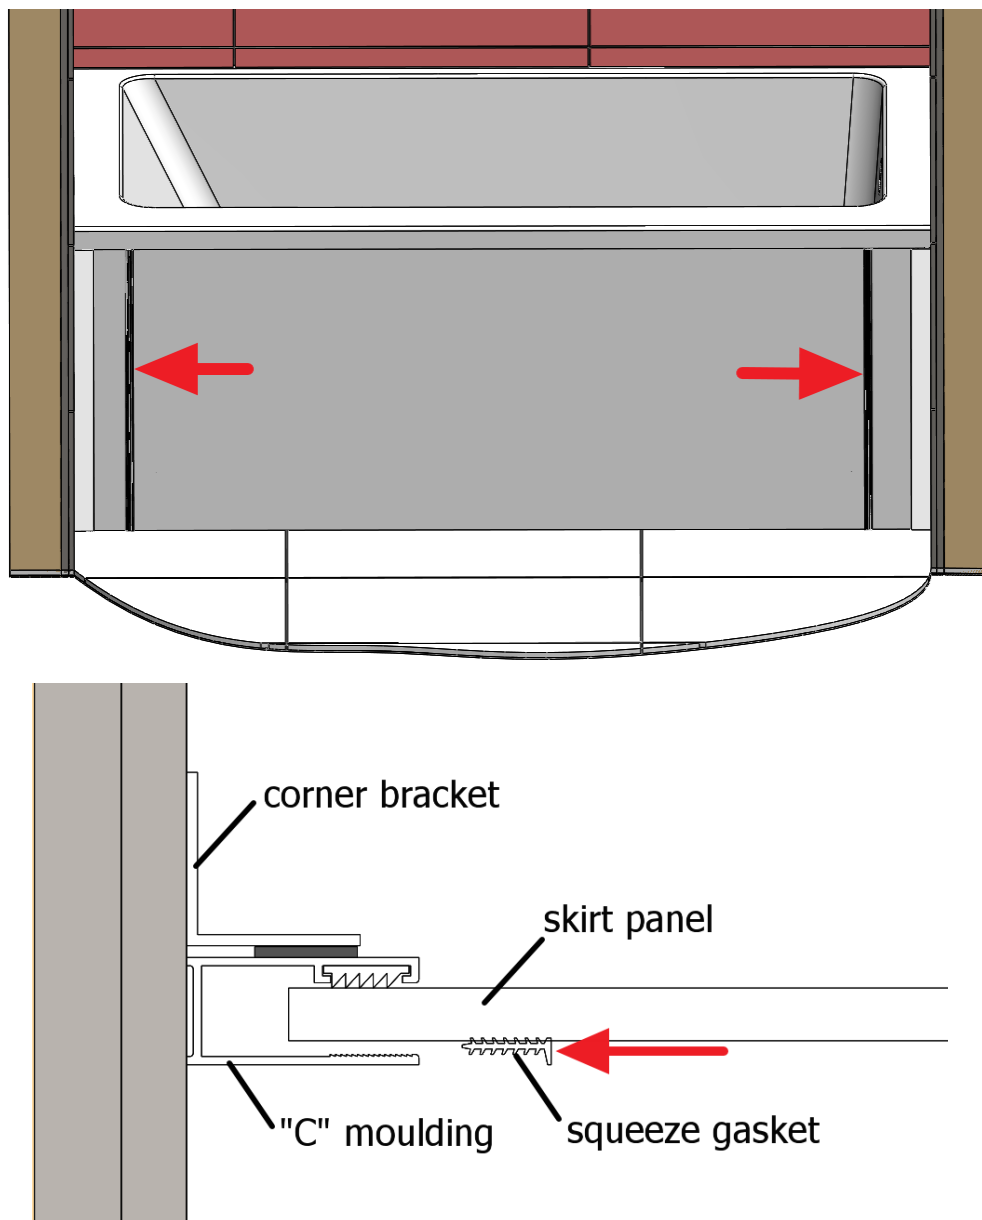

5.

1. Remove protective film from skirt panel. Install one "C" moulding at each end of the skirt, magnet towards the tub.
2. Place the assembly against the corner brackets (enter the top of the skirt first).
3. Push "C" mouldings against the walls.

6. Insert a squeeze gasket between the skirt panel and the "C" mouldings at each end of the skirt. Start at the bottom.

Notes :

- For some installations, it may be required to cut the skirt panel and the "C" mouldings. To do so, cut the top part of the skirt and the moulding because those parts are hidden behind tub's lip. Use a table saw for the skirt panel and a metal saw for the "C" mouldings.

- To remove the skirt, use the suction cup (supplied). Apply it in the lower corner and pull towards you. Other option : lift the bottom of the skirt (use a thin blade) and pull the bottom towards you.
